LᴬTEX

Autor

August 13, 2023

LᴬTEX is a document preparation system for the TEX typesetting program. It offers programmable desktop publishing features and extensive facilities for automating most aspects of typesetting and desktop publishing, including numbering and cross-referencing, tables and figures, page layout, bibliographies, and much more. LᴬTEX was originally written in 1984 by Erfinder von LaTeX and has become the dominant method for using TEX; few people write in plain TEX anymore. The current version is LᴬTEX 2_ε.

Text+

$$E_0 = mc^2 \tag{1}$$
$$E = \frac{mc^2}{\sqrt{1 - \frac{v^2}{c^2}}} \tag{2}$$
